## References

Available on request

Interior Architecture and Design graduate with good skills in technical drawing in CAD and Adobe CC. Passionate about exploring different perspectives, adaptable and detail-focused problem-solver, who works well in a team and independently. Seeking to build on existing skills and knowledge in the architecture industry.

## Work Experience and Live Projects

### Freelance Designer – Imago Interiors – March 2023 to May 2023

Design support for the senior designer and team, specialising in workplace and commercial interior design.

In my role used AutoCAD to draw up designs from existing site surveys to as built following the designers' specifications and exported them in staged packs.

### Vectorworks Trainer – Freelance – February to March 2023

Support the learning and boost confidence of an experienced designer who required 1:1 Vectorworks training to further their career.

I listened the student in sessions covering project organisation, use of the tools and visualisation palettes.

### Museum Curation - Sheffield Museum Youth - May to July 2021

Remote work experience, with site visit, reimagining the phone box in the Kelham Island Museum's Courtyard in a team of 14-to-25-year-olds.

I produced a CAD model of the site and idea to pitch to the Sheffield Museums board. Also shared ideas and research to the team.

### Product Design - EPIC Doncaster - May 2019

The client wanted to have a portable product as part of a youth crime prevention scheme to take around schools.

I put forward an idea which was developed, as a team, and made into a working product, which received positive feedback from the client.

## Achievements

Awarded BA Interior Architecture and Design, Degree Exhibition 2022  
Awarded Most Improved in Art and Design, Course Exhibition 2018
